

# Hari Thapa

Full Stack Developer (MERN) | Gurugram, Haryana

✉ harithapa4654@gmail.com · 📞 +91 8199911287 · 🌐 Hari-Thapa · 🏠 Hari

## Summary

Full Stack Developer with hands-on experience in the MERN stack, building responsive web interfaces and RESTful APIs. Familiar with JavaScript (ES6+), React, Node.js, Express.js, and MongoDB, along with JWT-based authentication and third-party API integration. Comfortable converting UI/UX designs into functional web pages and debugging front-end issues across browsers. Eager to learn modern web technologies, follow best coding practices, and contribute to real-world development projects in a collaborative team.

## Skills

**Languages:** JavaScript (ES6+), Java, HTML5, CSS3

**Frontend:** React, Tailwind CSS, SCSS, Context API, React Router, Responsive Design

**Backend & Databases:** Node.js, Express.js, MongoDB, MySQL (Basics), Redis, RESTful APIs

**Authentication & APIs:** JWT Authentication, OAuth (Basics), Third-Party API Integration

**Tools & Concepts:** Git, GitHub, Vercel, CRUD Operations, Data Structures, Debugging, Cross-Browser Testing

## Projects

### AstraMind | *React, Node.js, Express.js, MongoDB* 2026

- Developed a full-stack **AI chatbot** application with real-time response streaming and a clean, responsive chat interface.
- Implemented a **document query feature** allowing users to upload PDFs/DOCX files and retrieve relevant information through natural language queries.
- Built **RESTful APIs** for chat, document handling, and user management using **Node.js** and **Express.js**.
- Integrated **JWT-based authentication** with email verification and a simple subscription flow using a payment gateway.
- Used **React Hooks**, **Context API**, and modular **CSS** to build reusable UI components and manage application state.

### MoodFlow AI | *React.js, Node.js, MongoDB, SCSS* 2026

- Built a full-stack music streaming web app that detects user mood through facial expressions and serves mood-matched songs.
- Integrated a browser-based face detection library to classify expressions into basic moods and generate dynamic playlists.
- Implemented secure **JWT authentication** and a user dashboard with profile management and song upload features.
- Stored media assets on a cloud platform and used **MongoDB** for data persistence.
- Designed a responsive UI using **React Components**, **Hooks**, **Context API**, and modular **SCSS** styling.
- Live Link:** mood-flow-ai-ten.vercel.app

## Internship / Training

### AICTE Virtual Internship | *Microsoft Azure AI* | Certificate Remote *AI & Machine Learning Intern* May 2025 – June 2025

- Attended structured sessions on **Large Language Models (LLMs)**, **Machine Learning**, and **Microsoft Azure AI** services through the official AICTE portal.
- Earned multiple **Microsoft Azure badges** and completed hands-on assessments on the learning portal.
- Built a **Smart Fan Automation** project using a public temperature dataset and basic Python ML libraries in **Google Colab**. 🏠 Repo
- Developed a **Car Detection system** using computer vision to identify vehicles in traffic, aimed at supporting road safety.

## Education

**Saint Andrews Institute of Technology and Management (SAITM)** Gurugram, Haryana  
*Bachelor of Computer Applications (BCA)* 2024 – Present

**Guru Jambheshwar Senior Secondary School** Hisar, Haryana  
*Senior Secondary Education (Class 12)* 2023

## Certificates & Achievements

AI Azure Intern • Generative AI Studio Certification • TCS iON Career Edge
